MARS Company Announces New VEROFLOW Family of Portable Field Water Meter Testers

MARS Portable field meter testers for both residential and commercial applications

For Immediate Release

OCALA, Fla., June 20, 2016 (GLOBE NEWSWIRE) – MARS Company a global leader in water meter testing and technology solutions announced today that it has launched its newest versions of the VEROFLOW family of field meter testers designed specifically for the waterworks industry.

The VEROFLOW family of portable meter testers makes capturing lost revenue easy, effective and economical. MARS Company field meter testers will verify meter accuracy regardless of residential or commercial applications. Both the Veroflow-1 for residential applications and the Veroflow-4 for large field meter testing were designed for water utilities and providers in mind. MARS has also just released the High-Pressure version of the Veroflow-4, extending the high pressure capability up to the 300 PSI level. So no matter the application whether its residential, large portable meter testers or both, MARS has you covered with our VEROFLOW family of testers. MARS also provides certification, calibration and independent testing services.

The Veroflow-4 Utility Service Analyzer is designed for large meter testing in the field of all lengths and types. Maximize manpower with the ability for accurate in the field testing. With a July release of our new High-Pressure Model available, the VEROFLOW-4 can handle up to 300 PSI in addition to our Low-Pressure Model with a maximum 160 PSI. Based on comparison meter technology, fully linearized to ten points to compensate for inherent test meter accuracy curves. No need for a correction card. The Veroflow-4, for when testing to a higher standard of accuracy and repeatability is required. MARS is the recognized industry leader for water meter testing equipment of all sizes, residential through commercial.

- **Veroflow-4 Features and Benefits Include:**
 - Accurate to +/- 0.5%
 - 10-Point Linearization
 - +/- 0.1% Repeatability Accuracy
 - Resolve Customer Complaints
 - Meter Shop Quality with Mobility
 - Only NIST* Traceable Field Test Unit
 - NEMA 4X Explosion Proof Enclosure
 - Test Meters On-Site Without Removal
 - Corrosion Resistance 20 Years Minimum
 - Illuminated Multi-Function Display
 - Easy Operation Minimizes Errors
 - Lightweight Reduces Fatigue
 - 1-Year Limited Warranty

The Veroflow-1 Residential Meter Tester is the ultimate in portability while still being highly accurate. The simplicity of use with the Veroflow-1 is made easy by merely connecting the instrument to a customer's hose line and resolves customer complaints on the spot. Pulse signals generated by the turbine rotor are magnetically transmitted to the microprocessor, then computed into one of four units of measure. Results are shown on an easily read LCD display. With the ability to capture lost revenue with high accuracy and portability, why wouldn't every utility operator carry one.

- **Features and Benefits Include:**
 - Accurate to +/- 1.5%
 - Locate Pressure Problems
 - Resolve Customer Complaints On the Spot
 - Extremely Lightweight & Portable Field Testing
 - 5/8" x 3/4" Meter Threads & Length
 - Precision Microprocessor Test Unit
 - Can Use Four Units of Measure
 - 1 Moving Part: Turbine Rotor
 - 1 – Year Limited Warranty

MARS Company will be exhibiting at AWWA 2106 Trade show, June 20-22 in Chicago, IL at booth 1224. For more information about MARS Company and its VEROFlow family of testers, please visit www.MARSwater.com.

About MARS Company

MARS Company global leader in water meter testing and technology solutions. With more than 30 years' experience assisting municipal and private utilities throughout the world, MARS has a long track record of success. MARS core business and expertise include: Patented Water Meter Testing Systems & Software Technology, Innovative AMR/AMI Technology Products and Software Solutions and Water System Specialty Products. Innovative thinking allows MARS to leverage its unique, proprietary technology, patent positioning, manufacturing infrastructure, and world-class management strength, to further position itself as the leader in water industry.
